DVIGEAR®

HYPERLIGHT®

Typical Application

Source

Display

Transmitter

The Cable is powered by the connected source device, eliminating the need for an external power supply.

Receiver

The mini-DisplayPort connector may be connected directly to sources and displays, or to an included full-size DisplayPort docking connector.

Cables are available in lengths from 3 to 100 meters.

Included are two full-size DisplayPort docking connectors that may be used at the Source and/or Display ends of the cable.
