DViGEAR Shipping HDMI Fiber Optic Cables

Fully Integrated HDMI Fiber Optic Cable is an Industry First for DViGEAR

Orlando, FL – June 7, 2006 – DViGEAR, a leading provider of digital connectivity solutions, has announced that it is shipping its full range of HDMI Fiber Optic Cables. Offering exceptional signal fidelity and excellent noise immunity, these cables are ideal solutions for all applications where HDMI signals must be distributed over long distances without signal degradation. These cables are the only HDMI Fiber Optic Cables on the market today that have been officially certified by the HDMI testing authorities.

“With our HDMI Fiber Optic Cables, home theater designers, installers and enthusiasts can experience the full clarity and stunning visual fidelity of digital HDMI signals, with cable lengths up to 400 ft.”, said DViGEAR president Steven Barlow,. “Our unique, fully integrated design allows users to easily configure their choice of DVI or HDMI terminations in the field for added versatility.”

HDMI Fiber Optic Cables

Joining DViGEAR’s popular range of DVI Fiber Optic Cables, this new line of HDMI Fiber Optic Cables provides unmatched signal performance and fully transparent operation over a wide range of input resolutions with HDMI sources having bit rates up to 1.65 Gbit/sec. These cables support HDTV resolutions up to 1080p and PC resolutions up to 1920x1200/60 Hz with cable lengths over 120 meters (400 ft.).

The HDMI Fiber Optic Cable has a unique design that features a “source” end with an integrated +5VDC power jack for applications where the signal source does not provide sufficient output current, and a “display” end that is very narrow measuring only 23mm (0.9”). Both ends of the cable are terminated into a female HDMI connector. By using a short HDMI male to DVI male (copper) cable, this cable can also be used to support DVI applications. Due to its narrow outside diameter, the “display” end of the HDMI Fiber Optic Cable can navigate narrow passages (conduit) that are too small for conventional DVI cables.

DViGEAR’s HDMI Fiber Optic Cables are available in the following pre-terminated cable lengths: 10, 15, 20, 25, 30, 50, 75 and 100 meters. Custom cables lengths will be available on a special order basis. The suggested list prices for these HDMI Fiber Optic Cables range from \$550.00 to \$2,420.00. These cables will be on display at DViGEAR’s booth # 501 at the InfoComm show in Orlando, Florida.

To order these products or to get additional information, please go to <http://www.dvigear.com> or call DViGear at 888.463.9927. For marketing support materials, including high-resolution photos, please contact Sara Abrons at 919.969.6681, x121 or sabrons@kayye.com.

About DViGear

DViGear has been recognized as the leading expert in digital connectivity solutions since 1999, when DVI and DFP technology first appeared on professional and consumer electronics markets. Originally founded by industry icons Gary Kayye and Jody Thomas, DViGear is now under the leadership of 25-year projection veteran Steven Barlow.
